Report of "Ethical Considerations in the Use of AI for Mental Health" organized on World Mental Health Day 2021

In commemoration of World Mental Health Day 2021, the Department of Psychology, PPN PG College organized a seminar on October 8, 2021 exploring the intersection of technology and mental health. The distinguished speaker for the event was **Prof. N. K.**Sharma from IIT Kanpur, whose expertise in the field promised insightful perspectives on the evolving relationship between technology and mental well-being.

The event began with an opening address by event coordinator Dr. Abha Singh highlighting the significance of discussing the impact of technology on mental health, especially in our increasingly digitized world.

Prof. N. K. Sharma delved into the technological landscape and its implications for mental health. He discussed the ways in which modern technologies, including social media, smartphones, and artificial intelligence, shape mental well-being. His insights shed light on the potential benefits and challenges arising from the pervasive use of technology in our daily lives. The seminar seamlessly transitioned to the psychological dimensions of technology use. Prof. N. K. Sharma explored how technology influences human behavior, emotions, and interpersonal relationships. Attendees gained valuable insights into the psychological impact of prolonged screen time, the role of social media in shaping self-perception, and the potential benefits of integrating technology into mental health interventions.

Prof. N. K. Sharma highlighted innovative developments in the field of mental health care facilitated by technology. He discussed the emergence of mental health apps, virtual therapy platforms, and the use of artificial intelligence for early detection and intervention.

This segment aimed to showcase the positive contributions of technology in enhancing accessibility and effectiveness in mental health care.

In conclusion, the seminar on Technology & Mental Health by Prof. N. K. Sharma was a thought-provoking exploration of the complex interplay between technology and mental well-being. The event, organized on World Mental Health Day, underscored the importance of understanding and navigating the digital landscape for the benefit of mental health. Prof. N. K. Sharma's insights provided attendees with a nuanced perspective that encourages responsible and mindful engagement with technology in the context of mental health. The seminar is attended by over 75 students and many faculty members of the college.
