**3.2.2: Number of workshops/seminars/conference including programs conducted on Research Methodology, Intellectual Property Rights (IPR) and entrepreneurship (Session: 2022-23)**

## **Special Lecture on the IPR Strategies for Green Technologies in Plastic Recycling**

**organized By Dept. of Botany on 05.06.2022**

The Department of Botany organised a special lecture on the eve of World Environment Day 2023. On the Topic: IPR Strategies for Green Technologies in Plastic Recycling. Dr. Sonal Mishra (Asst. Prof., Department of Botany, A N D College, Kanpur) was invited as a guest for the occasion, and the respected Principal (P. P. N. College, Kanpur) joined as Chief Guest. All the faculty members of the Department of Botany and about 100 students actively participated. The program was coordinated by Mrs. Alka Rani (In-Charge, Dept. of Botany) and was assisted by Mr. Anil Kumar Singh (Asst. Prof., Dept. of Botany) and Dr. Vinod Kumar (Asst. Prof., Dept. of Botany).

Dr. Mishra gave a detailed information on Plastic pollution and discussed with the students of our college. She shared that Plastic pollution accumulating in an area of the environment is considered "poorly reversible" if natural mineralization processes occurring there are slow and engineered remediation solutions are improbable. Should negative outcomes in these areas arise as a consequence of plastic pollution, they will be practically irreversible.

Potential impacts from poorly reversible plastic pollution include changes to carbon and nutrient cycles; habitat changes within soils, sediments, and aquatic ecosystems; co-occurring biological impacts on endangered or keystone species; ecotoxicity; and related societal impacts. The rational response to the global threat posed by accumulating and poorly reversible plastic pollution is to rapidly reduce plastic emissions through reductions in consumption of virgin plastic materials, along with internationally coordinated strategies for waste management.
