1. introduction to LaTeX: LaTeX, which is pronounced «Lah-tech» or «Lay-tech» (to rhyme with «blech» or «Bertolt Brecht»), is a document preparation system for high-quality typesetting. It is most often used for medium-to-large technical or scientific documents but it can be used for almost any form of publishing.

LaTeX is not a word processor! Instead, LaTeX encourages authors not to worry too much about the appearance of their documents but to concentrate on getting the right content. For example, consider this document:

Cartesian closed categories and the price of eggs

Mr. Ashish Tripathi

March 2022

PPN PG College!

To produce this in most typesetting or word-processing systems, the author would have to decide what layout to use, so would select (say) 18pt Times Roman for the title, 12pt Times Italic for the name, and so on. This has two results: authors wasting their time with designs; and a lot of badly designed documents!

Conclusion: The Seminar on the Title : "**How to write research Paper**" proved to be a valuable and timely event for the participants from PPN PG College. **Mr. Vikram Sharma** expertise and engaging presentation style contributed to a meaningful exploration of the subject. Attendees left the workshop with heightened awareness, practical strategies, and a commitment learn technology use.. The Department of **BCA** at PPN PG College successfully organized an event that enriched the understanding of the complex dynamics in writing research papers.
