3.2.1: Institution has created an ecosystem for innovations and has initiatives for creation and transfer of knowledge (Patents filed, Published, incubation Facilities)

The screenshot shows the Craft Tatva website profile for artist Sanskaar Singh. The header includes contact information: 'tellus@crafttatva.com | Helpline - +91-7676623391 | Sell Your Art', a promotional message 'Worldwide Shipping. Use HAPPY10 for flat 10% OFF', and social media icons. The navigation menu lists 'Paintings Artists Curators Love New Arrivals On Discount Blog Story'. The artist's profile features a small portrait, the text 'ORIGINAL PAINTINGS SANSKAAR SINGH', and a bio: 'Joined Craft Tatva: October 2023 N/A'. Below the bio, it lists 'Focus Areas: Figures, Faces, etc.'. A large image shows a painting of a child with a large nose, displayed in a gallery setting with a chair and table. A 'Need help?' button is visible in the bottom right corner.

Sanskaar Singh is an established painter from our college.

BHARATTECH

BharatTech is a digital startup that creates software-based products to streamline organisations' operations by connecting their work on its platform so that they can access data, combine their work, and increase productivity. In addition, BharatTech is creating a digital ecosystem for the general public to provide them with a platform that is secure and safe and does not improperly use the user's data for their benefit. It is striving to offer general consumers the same calibre of services that are often only available via subscription at no cost.

Why did this start-up choose to concentrate on this area of information technology?

One of the startup's main goals from the beginning was to give the Indian public and businesses a platform where they could operate without worrying about the security and privacy of their data. These two are the startup's cornerstones and the foundation upon which it is erecting its empire.

People have been increasingly going online to do their work, learn, and expand their enterprises during the past two decades. And because of this significant increase, it is crucial to have various software programmes like search engines, email clients, messaging services, and social networking platforms.

P.P.N. (P.G.) College, Kanpur

96/12 Mahatma Gandhi Marg, Kanpur -208001

•Telefax: (0512)2361924 • Mob.: 8707538344•

•Website: www.ppncollege.org • email:ppncollegekanpur@gmail.com•

When compared to the beginning of the decade, we have significantly evolved and now have access to a variety of software that helps us complete our work quickly. What was once regarded as the invention of the decade, however, has now evolved into an unkillable nightmare for everyone who has access to the Internet. Due to its inherent power to alter a group's attitude and produce cash in the most extensive way imaginable, data has proven to be the most valuable object in the world.

Birth Of BharatTech

These days, businesses use the data of customers who access the Internet through their services as a direct and indirect source of income. The services have undoubtedly improved, but each year sees a decline in the security of customer data. As a result, data is increasingly being used directly or indirectly to make money for the corporation itself. Furthermore, it is much more crucial that we defend ourselves in this area for a developing nation like India.

BharatTech was founded as a result. The primary goal of the BharatTech foundation was to allow current internet users to carry out their tasks as they are currently doing them, browse the internet, and expand their businesses without allowing a third party or themselves to use the users' data to generate fictitious revenue.

The basic tenet of BharatTech is that it will never exploit user information to influence their behavior or give them information they don't need. Instead, develop a really original strategy for delivering results that are essential and naturally applicable. Additionally, no software-based platform shall display sponsored searches or results by using any user data.

As a result, a new indigenously developed tech ecosystem is being created for public that will ensure that individuals, companies, institutions, and organizations grow at a good rate without having to share data under duress or be denied access to crucial services like corporates, networks, and the internet of things.

AWARDS AND RECOGNITION

Till Date BHARATTECH has got several Awards and recognition.

- 1) In FEB 2021 BHARATTECH got first rank in "Aarambh Startup Summit".
- 2) In MAR 2021 BHARATTECH got chance to show case their products in "INDIA - ISRAEL Innovation Summit".
- 3) In MAY 2021 BHARATTECH got 2nd position in "Propel Pitch Fest" Organized by BM Munjal University.
- 4) In FEB 2023 BHARATTECH got Selected amongs those four startups which are going in front of Prime Minister Sri Narendra Modi in "GLOBAL INVESTORS SUMMIT 2023".

Bharat Tech in the field of technology, being run by Our M.A. Student from the Geography department, **Mr. Tushar Trivedi**.
